

Training Program on Plant Optimization

"CPRI in association with Water and Power Consultancy Services Limited (WAPCOS), conducted a Training Program on Plant Optimization for Zimbabwe Power Company (ZPC) Officials at Hwange Thermal Power Station, ZPC, Hwange, Zimbabwe. The training program included technical lectures and demonstrations on various aspects of power plant optimization. About 200 ZPC officials from graduate trainees to senior management levels participated in this training program in four batches of about 50 participants each. The program was conducted in two phases, one during February – March 2018 for the first two batches and the next one during May-June 2018 for the other two batches. The appreciation note by ZPC, Zimbabwe is given below."

This is the unique type of training programme conducted by CPRI at overseas.

His Excellency, Shri R. Masakui, the Indian Ambassador to the Republic of Zimbabwe inaugurating the third batch of the program on 23rd May 2018 at Hwange Thermal Power Station, Hwange, Zimbabwe.

The Trainees of the Third Batch of the Program on "Plant Optimisation for ZPC Engineers" at Hwange Thermal Power Station, Hwange, Zimbabwe.

The customer feedback on the training programme is as follows :-

Re: Plant Optimization Training at Hwange Power Station.

This note serves to appreciate and commend the professionalism exhibited by the Central Power Research Institute team during their training facilitation of the Plant Optimization at Hwange Power Station. It was very evident that they commanded vast experience in both theory and practical knowledge of the power plant.

The team addressed teething problems in the station which included among other things, sampling, clinkering, water treatment, combustion optimization, the Rankine cycle and various other plant topics.

I highly recommend them for any consultation in the power generation industry.

Yours faithfully,

Eng.S.Makuvaza
Section Head Technical Training.
